Data Governance Technology 101

Key Implementations to Success

Data Governance technology isn't a "one size fits all" solution to your organization's needs.

By leveraging a strong Data Governance foundation, you can utilize technology to create a **data-driven culture** and establish **trust in your data**. Main technologies include:

Data Catalog
Find Your Data

Business Glossary
Understand Your Data

Data Quality
Trust Your Data

Technology Vendors

Vendors fall into several categories. These are just some of the **many vendors** that exist in the Data Governance space. Making sense of the technology offerings can be difficult; **the Prominence team can leverage their expertise to make a recommendation based on your organization's individual needs or help you make the most out of your existing investment.**

Suite of Capabilities

Informatica
Collibra
IBM erwin
Rocket software
asg technologies

Stack-Centric Technology

snowflake
databricks
Google Data Catalog

Niche Technology

Alation
data.world
BigID

Defining Success

Lead your team to long-term success with your tool by following this path:

Define the **why** and **why** for your tool → Turn "why" into use cases for needed capabilities → Define needs for **now** and **later**
