

# Prominence Atlas: AI-Powered Metric Generation

## Rapid, Standardized, & Automated Metric Creation

Whether you're starting to build your organizational glossary or establishing consistency between existing metrics, it can be hard to know **what to define or where to start**. Prominence Atlas provides instant access to **consistent, AI-generated glossary terms and definitions**.

Data Governance programs establish guidelines to help create quality content for your organization, but these guidelines can be too lengthy for content creators to remember when creating terms and definitions. Prominence Atlas takes the guesswork out of term generation: **with one click, you can generate a metric definition or identify a similar definition, all while adhering to data governance best practices**.

Decrease time spent defining glossaries by **92.5%**. Save over **\$175,000** with this saved time.

## Your AI-Generated Data Governance Starter Kit

Your organization could be wasting **hours each week on metric creation and review**. Searching for data governance guidelines, confirming metric accuracy, and identifying potential duplicates wastes precious time. Prominence Atlas removes the manual portion of metric creation. Using Generative AI, Prominence Atlas uses our database of **approved, governed metrics** and will automatically create a glossary of trustworthy terms that you can use organization-wide.

With Atlas, your team will unlock:

Terms & Definitions Generated within Prominence Best Practices

Reduced Level of Effort for Team Members to Create & Review Content

Duplicate Term Identification & Reconciliation

Easy Reuse of Metric Definition Outputs in Every Tool & Technology

**Create & Edit New Definitions Based on Data Governance Best Practices**

4. Review and accept the glossary definitions in the "Details" panels after generation. Once accepted and finalized, glossaries will move to the certification workqueue for final review.

**Select Existing Metric Definition Based on AI-Detected Term Similarity**

Select Workbook: Care Optimization

**Creating "Patient Age"**

Here are potentially related certified metrics. Choose Copy Selected to copy a certified metric. Choose Generate New to create a new metric named "Patient Age".

Metric	Definition	Similarity
Medication Frequency	The number of times per day a patient is prescribed to take a medication.	33.83%
Medication Dosage	The medication strength prescribed to a patient by a provider.	33.398%
Acuity Level	The general level of patient illness, urgency for clinical intervention, and intensity of resource use. There are several scales and ways to measure acuity level, including but not limited to: Emergency Severity Index (ESI), Case Mix Index (CMI), etc.	29.959%
Risk of Mortality	Risk of Mortality (ROM) captures the medical classification that estimates the likelihood of a patient death while in hospital, on scale of 1 - 4. ROM is measured according to the following scale: 1 - Low, 2 - Medium, 3 - High, 4 - Extreme Risk of Mortality is documented on the APR-DRG line within the Groupers table of ICD-10 inpatient coding abstract. ROM is captured throughout a patient encounter: upon treatment (Working Risk of Mortality) and upon discharge (Final Risk of Mortality)	28.159%
Index Admission	Any eligible admission to an acute care hospital assessed in the measure for the outcome (readmitted or not within 30 days).	26.729%

## Access the Atlas

Our team is ready to bring Prominence Atlas to your organization. Contact our team today to set up a no-strings-attached call with our team of experts:

"Prominence was thoughtful. Probably the most important thing was that they learned about our fabric. **They learned who we are and what we stand for.** We were looking for value. We tend to go to boutique firms that have a specialized niche, and we could have easily given our work to one of the big four, but we would have also paid twice the amount. **Prominence went the extra mile to not only have an affordable fee but also be a partner. That really made a difference.**"

- Director, December 2023
