

# A Guide to BI Tool Consolidations & Conversions

## Streamline Your Tech Stack for Long-Term Success.

Healthcare organizations commonly support multiple BI tools. This can allow teams to access their data and create reports for leadership, but can lead to **ungoverned data** with many people **reporting on the same metric but getting different numbers, additional costs, an untenable support situation, and many, many other challenges.** Consolidating BI tools allows your organization to focus your efforts on the one platform that you know will meet your organization's needs.

Prominence Advisors has empowered some of the country's largest health systems with efficient **self-service analytics** in the platform that best meets their needs. Our proven processes allow customers to be able to not only convert or consolidate to an enterprise BI platform, but also **improve their analytics capabilities.** It's not just 'lift-and-shift', but **forward progress toward organizational goals.**

Key results include:

100% governed, re-usable metrics and dimensions

\$300k+ saved on license fees (on average)

247 new global metrics established (on average)

4x increase in ability to deliver solutions with no increase in staff

## Levels of Support

Whatever your desired level of service, our team is prepared to offer you support with:

### Operationalization:

This takes best practices for development, visualization, & data governance and wraps them into a recommended development process, to roll out to developers and users across domains.

### Application Coaching:

Our build team walks your developers through how they'd approach developing an application and we develop side-by-side with your team.

### Application Build:

Our build team develops applications within your best practices or best practices we provide.

Our team of experts is prepared with a **clearly defined, comprehensive review process** to align stakeholders on key areas of the engagement to ensure success. Before the conversion or consolidation process begins, we'll review the following areas to appropriately plan to maximize efficiency:

People

Customer Landscape

Project

Change Readiness

Tools

Risks

"Prominence is the **best vendor that I have ever worked with in my entire professional career.** The vendor is always there to help. They don't nickel-and-dime me. In terms of expertise, Prominence knows what they are talking about, and they get things done quickly. I can't speak highly enough of the vendor."

- Analyst/Coordinator, July 2023

"The firm has been extremely helpful. All the people I work with are super professional. They communicate very well and are very organized. Their documentation is excellent, and their build is very good too. I have had a **great experience with Prominence.**"

- Manager, November 2023
