

Turning Epic's New Features into Measurable Outcomes

Epic UGM 2025 introduced powerful innovations across AI, data, ERP, and patient engagement. Here's what they mean for you—and how Prominence can help.

AI Enablement: Art, Emmie, Penny

Epic's AI agents are here to transform clinician, patient, and revenue cycle workflows.

We help you:

- Validate and tailor Epic's AI note generation for your specialties.
- Develop adoption playbooks for clinicians, coders, and patients.
- Establish monitoring and governance for safe AI use.

Cosmos & Healthcare Intelligence

Cosmos now includes 300M+ patient records with predictive AI for LOS, readmissions, and diagnostics.

We help you:

- Operationalize Cosmos insights for frontline use.
- Build predictive dashboards for population health and rare disease care.
- Train teams to interpret and trust AI-driven predictions.

Revenue Cycle Optimization

Penny is expanding into autonomous coding and claims follow-up.

We help you:

- Integrate Penny into denial management and billing workflows.
- Measure coder productivity and AI accuracy.
- Prepare for automation with phased rollout strategies.

EpicOps ERP Alignment

Epic's new ERP suite (finance, workforce, supply chain) is poised to replace legacy systems.

We help you:

- Evaluate current ERP pain points and EpicOps readiness.
- Build phased roadmaps for adoption.
- Deliver quick wins with modules like credentialing and time & attendance.

Clinical & Operational Optimization

OR & Infusion Scheduling:
Improve block utilization and reduce underuse.

Capacity Dashboards:
Gain system-wide visibility into beds and throughput.

Training & Change Management:
Ensure frontline adoption of new tools and workflows.

Why Prominence?

We specialize in bridging the gap between Epic innovation and operational reality. From AI readiness to ERP transitions, we bring proven expertise in workflow design, change management, and data analytics.

Let's talk about how your organization can harness Epic's next wave of innovation
