Capacity Management

Optimize your throughput management with Prominence's Accelerators and real-time data via the Prominence Platform.

Understand your operations, including throughput times, block utilization, and ED management, to improve your overall volumes and efficiency.

Increase Throughput Management with Real-Time Data

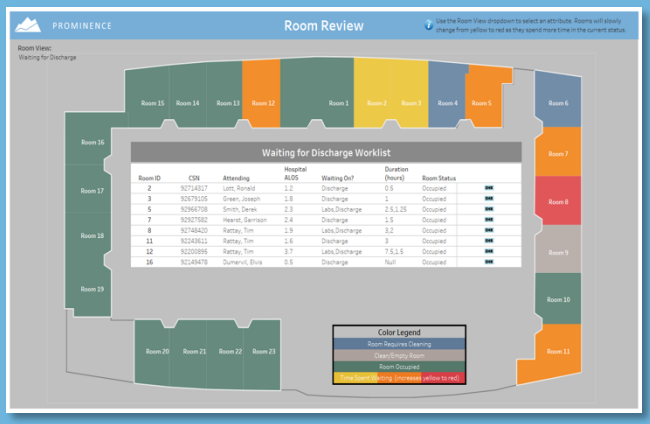
Prominence's Accelerators provide some of the largest healthcare organizations in the country with solutions for their most common problems. **Increase efficiency** and **access your data in real-time** with Prominence.

Capacity Management

Prevent over-crowding and optimize your capacity through real-time data and a comprehensive, system-wide view in a single pane of glass.

Inpatient Rooms

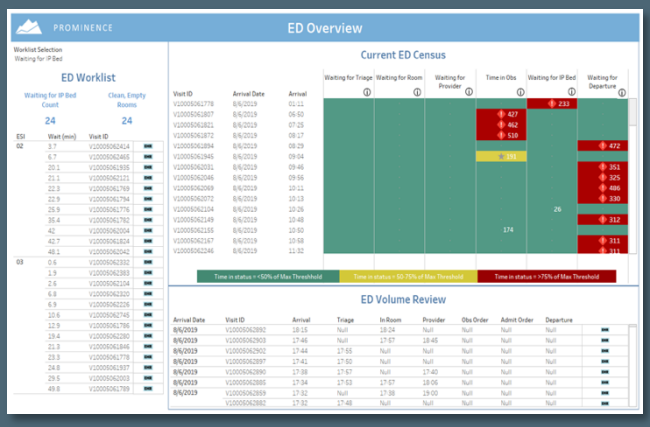
Understand what's happening in each inpatient room in rea-time. Recognize bottlenecks in your processes and identify opportunities for improvement.



ED Command Center

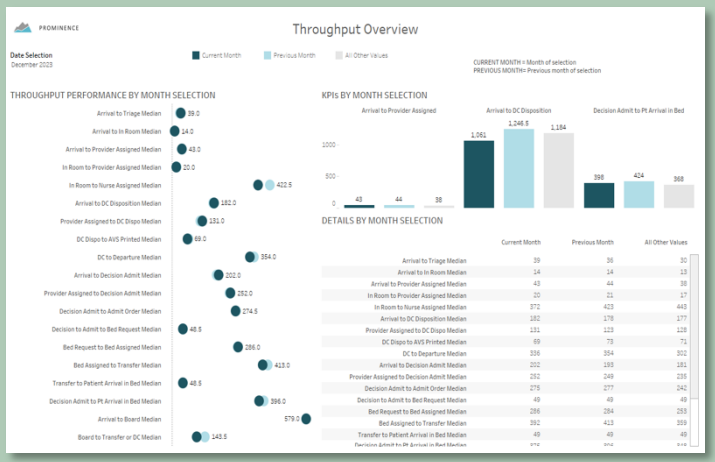
Bring your data into real-time, accessing KPIs like:

- Discharges before noon
- ED Throughput
- Waiting on – labs, providers, transfers, etc.



Throughput Overview

Review throughput performance by month, comparing KPIs for specific points in your operations.



Throughput Review

Gather all metrics from mission-critical data sources to create a **one-stop shop of information** for managing EDs. Quickly view key throughput metrics in **real-time and against historical trends** to **identify bottlenecks.**

Block Utilization

Optimize OR access, strategically grow case volumes, and automate the delivery of actionable insights. Unlock:

- $10M+ additional revenue opportunity per facility
- 10%+ increase in block and room utilization
- 2,000 hours of manual work eliminated annually

Optimize Bed Utilization Today: Unlock the Accelerators
