Cogito + Data Governance

Epic's Reporting Strategy is Changing - Are You Prepared?

Whether your organization already has a governance foundation or you're starting as a blank slate, the Prominence team is prepared to build a **data governance strategy** that will set your organization up for the future.

Prepare for the adoption of Epic's Cogito tools such as the Analytics Catalog, Cogito Data Governance and the migration of data storage from Oracle to SQL and to the cloud by establishing the **principals of data governance** in three phases.

With upcoming changes to Epic's reporting strategy, it's important to choose a **trusted partner** to guide you through your data governance journey. Prominence's proven 3-step process ensures that your organization is set up for **long-term success and growth**.

Clean Up	Create a Stable State	Prepare for the Future

Step 1: Clean Up
Understand your existing tools and reports, checking for report duplication, security concerns, access requirements, and more. Prominence Advisors has partnered with healthcare organizations to **identify opportunities** to streamline workflows, improve communication, and manage intake requests.

Step 2: Create a Stable State
Improve your processes to **create stability** within your organization. Review your analytics and reporting system, including team skillsets, data development pathways, and an Epic reporting environment review. Our customers benefit from our guidance in operationalizing a data governance plan.

Step 3: Prepare for the Future
Changes are coming, and your organization needs to be prepared. Establishing a strong data governance foundation now can **make sure that your organization is ready for changes** like:
- Migration from Oracle to SQL Server
- Conversion to new templates like Cogito SQL
- Migration to Azure Cloud
- Enabling Slicer Dicer Models
- Use of Analytics Catalog over My Reports

Why Now?

Prioritizing data governance now allows your organization to **more efficiently manage change and adoption**. This will **reduce the amount of end user-facing changes** and **minimize the overall impact** on your team.

Epic has set deadlines for major changes, so it is crucial for your team to get ahead of these changes now. Deadlines include:
- 2024 - Crystal Integration
- 2027 - Cogito no longer supported on Oracle

Your Support Team

As your organization navigates changes to Epic's infrastructure, Prominence's data governance and deployment teams are combining forces to guide your organization through these migrations.

Data Governance: Aligning People, Process, and Technology

Prominence Advisors' team of experts is ready to guide your organization through the next step in your data governance strategy, aligning **people**, **process**, and **technology** to set you up for long-term, scalable success.

People	Process	Technology
• Executive Sponsors • Analytics Team • Governance Structure • Stewardship • Epic Support Team	• Data Strategy & Alignment • Data Validation & Quality • Analytics Life Cycle • Intake & Prioritization • Knowledge Management • Self-Service Capacity • Report Deduplication • Report Promotion	• Architecture • Analytics Catalog • Cogito Data Dictionary • Cogito Data Governance • Slicer Dicer • CogitoSQL • Azure

Deployment: Epic-Based Tool Configuration

At every stage of your Epic journey, our team of Epic veterans are ready to support. With an average of 10 years of experience and certifications in every Epic module, our team understands the intricacies of your organization's unique needs.
