Epic Tableau Integration

Integrate Tableau Dashboards in your Epic Environment

Build confidence in your organization's reporting with the Epic Analytics Catalog. **Embed Tableau in Epic's Hyperdrive to give your team one unified catalog of all necessary analytics.**

Utilize the **intuitive dashboard and report design, comprehensive searching, and Epic metadata** to:

| Establish a Single Source of Truth | Launch Patient Charts in Hyperdrive | Leverage Epic Metadata to Curate Dashboards | Utilize Epic's Validation, Approval, & Security |

Use Report Metadata to Define Your Curated Toolset

Allow your team to **confidently navigate** your analytics dashboard with comprehensive metadata in Epic.

Improve **data literacy a**nd promote **self-service analytics** with this solution. Replace siloed, incomplete data with a **single source of truth**, allowing for **comprehensive navigation and discovery of content**.

Epic Tableau Integration in Action at UKHC

The **University of Kentucky HealthCare** team has realized the potential of this integration at their organization.
