# Accelerate
Adoption of Axon and EDC

Governed data is the path to understanding, trusting, and using the wealth of information at your fingertips. Business glossaries, data catalogs, lineage, and metric standards lie at the foundation for data governance.

## Accelerate Adoption. Save Time. Kickoff to Launch in 30 Days.

In as few as 30 days, Prominence can implement Informatica's Axon and EDC products, to offer a complete solution to address people, process and technology.

Prominence has been working with healthcare organizations for years to tackle data challenges. The majority of our team came from Epic and understands the impact application design has on the information life cycle, data usage and trust. We leverage our depth of Epic, healthcare and process knowledge to accelerate the design, implementation and deployment of Informatica.

Project Services & Deliverables

- Best practice workflows and roadmaps to establish stewardship and metric standardization
- Implementation of a glossary and catalog technology
- Experts to install the solution, load terminology, scan data sources configure integration and workflows and define a roadmap for further adoption

Ready to Get Started?

To get started, we will focus on best practices and adoption:

- Where does your organization struggle to align on terminology?
- Where do you have engaged users hungry for data, meaning and context?

Contact Prominence today to learn how you can also see amazing, transformational results of Axon and EDC today!
