

PROMINENCE

Healthcare, Smarter.

Bundled Payments

The CMS Bundled Payments for Care Improvement initiative strives to reduce fragmentation across the continuum of care and improve overall quality by aligning incentives between all providers involved in an episode of care.

Prominence's Bundled Payments Application helps organizations manage their performance by combining information from claims, EMRs, Care Management Documentation System, and Patient Satisfaction Surveys.

Our application will provide all the information needed to evaluate cost and quality variation associated with the care delivery for patients, and help you prioritize areas of focus for better coordination of care, which will result in better care, smarter spending, and a healthier patient population.

By aggregating and acting on data, participants in previous BPCI programs “generated average savings of \$2,300 per episode, a 21% reduction in readmission rates and a 30% reduction in post-acute costs” <https://www.becker-shospitalreview.com/hospital-management-administration/why-you-should-apply-for-bpci-advanced-now.html>
