

PROMINENCE

Healthcare, Smarter.

Imaging & Radiology

Prominence's Imaging and Radiology solution aggregates all of your key performance indicators into a single, cohesive application. Understand the performance of your organization on a department, specialty, or provider level to find areas to improve and high-performers across metrics such as RVU productivity, WLUs (workload units), volumes and turn-around times for each step in the exam process.

In addition to monitoring performance indicators, end users can create custom, on-demand reports and even search through text entered by providers. This ensures that your data consumers are never at a loss to find what they need; at the time they need it.

View performance across your KPIs, such as RVUs, WVUs, turnaround times and many more.

Compare providers, specialties and departments to focus improvement efforts.

Create Custom Reports and analyze free-text to find additional insights in your data.
