MD Scorecard

Get a snapshot of physician performance metrics for your organization in a single application. Prominence's Physician Scorecard application combines performance metrics from Core Measures to Patient Experience to give you a wholistic view of your physician groups and individual providers. The application also allows you to drill down as far as the encounter level, so you are equipped to investigate and take action on positive or negative trends.

The application also supports regulatory reporting, such as OPPE and FPPE.

Compare performance by specialty or by individual physician to identify high performing practices and opportunities for improvement

Investigate variances at the patient encounter level to understand and initial workflow initiatives

Provide physicians with an **individual scorecard** which tracks their performance over time and benchmarks against organizational goals
